Contents

Initial setup

➢ Created JIRA cloud project
➢ Registered all bugs from previous Lab works
➢ Created a sprint for bug fixing
➢ Assigned tasks

Bug registration and adding to backlog

Backlog 6 issues   Create sprint

🔲 All controllers implementing CRUD actions have a lot of duplication	TES-1 ↑
🔲 Handling promises should be consistent	TES-2 ↑
🔲 Authentication middleware should have a more robust way of defining public URLs.	TES-3 ↑
🔲 Test files names are not clear	TES-4 ↑
🔲 Unresolved TODOtag in app.ts	TES-5 ↑
🔲 Don't throw generic errors	TES-6 ↑

Bug descriptions

TES-8   👁 1

Task title is displayed weird when task width is too small

STATUS

To Do ⌄

Description

Steps to reproduce:

Create a task with a long title and short timespan.

Title is outside task boundaries.

Implementation details:
Use tooltip when the width is smaller than X, and trim text when title is longer thatn Y.

Environment

None

TES-7 👁 1

Correctly calculate month width

STATUS

To Do ⌄

Description

Currently, the month label width is calculated by dividing the month-count. This approach is not taking into account that months have a different amount of days and don't align correctly with the timeline.

Environment

Sprint report

Conclusion

Learned to work with project management tools with a team. Also worked on creating sprint reports and analyzing sprint progress.
